

```
#include <stdio.h>

int main()
{
    int n;
    scanf("%d", &n);

    if (n == 1)
        printf("one");
    else if (n == 2)
        printf("two");
    else if (n == 3)
        printf("three");
    else if (n == 4)
        printf("four");
    else if (n ==
5)
        printf("five");
    else if (n == 6)
        printf("six");
    else if (n == 7)
        printf("seven");
    else if (n == 8)
        printf("eight");
    else if (n == 9)
        printf("nine");
    else
        printf("Greater than 9");

    return 0;
}
```
